- Tested the quality of computer and console games
- Prepared reports of performed tests and found bugs using Jira and Confluence systems
- Conducted performance tests
- Made suggestions about the mechanics and the aspects of the player's experience leading to improvement of the quality of tested products

PROJECTS

EKOLANDIAKASZUBY.PL

REACT ◦ STYLED-COMPONENTS ◦ FRAMER-MOTION ◦ AXIOS ◦ FIGMA

- Designed and implemented a fully responsive product website for the tourism company Ekolandia.
- Created a google business profile to increase traffic and reach more potential customers.
- Integrated bookings calendar with external booking.com API and implemented cors-proxy using firebase cloud functions.
- Used frameworks such as Swiper.js and framer-motion to make the application stand out from the competition.
- I created the project taking care of good SEO practices and added the domain to google search engine. Currently, the website along with the business profile is positioning on the first page of Google results and is generating more than 5,000 impressions per month.

BB-ECOMMERCE.NETLIFY.APP

REACT ◦ STYLED-COMPONENTS ◦ GRAPH QL ◦ REACT-ROUTER ◦ FIGMA

- Implemented the front-end layer of the ecommerce application almost all of whose content is dynamic and is taken from the backend
- I meticulously transitioned the received prototype in Figma into final product and fulfilled the set requirements of the application.
- Used Graph QL and Apollo library to retrieve data from the application backend.
- Used the context API to simplify the flow of information inside the application and to create code focused on scaling
